

TROY UV Toner Solutions

Patented Document Fraud Prevention

Using TROY Ultraviolet ("UV") Toner for printing secure documents provides security and authentication features in one step. Images printed with TROY UV Toner appear as standard black ink to the naked eye but fluoresce blue under UV verification light. Authentication is achieved when the document is held under a UV light, thus providing an additional layer of security upon verification.

- School transcripts
- Titles
- Classified documents
- Shipping documents
- Legal documents
- Gift certificates
- On demand payroll
- Accounts payable
- Tickets
- Vital records
- Corporate contracts

Major Selling Points

- Reduces Document Fraud Documents printed using TROY UV toner are highly resistant to most counterfeit techniques.
- Simplifies Workflow Easy visual verification and authentication of important documents helps the review and verification process.
- Standard and MICR Formulas Solutions available in MICR and Standard Toner formulas for all high value documents
