

TYPES OF ULTRAVIOLET (UV) SUPPLIES:

SecureUV:

TROY SecureUV Ink & Toner solutions replace standard or color cartridges in your printer. The print appears clear and is not easily detected by the naked eye. When utilizing a UV verification light, the areas printed with SecureUV will fluoresce.

Color UV:

TROY Color UV Ink appears as specified colors cyan (c), magenta (m), and yellow (y) to the naked eye, but fluoresce under a UV verification light. Products are currently available to fluoresce in a series of colors.

Standard UV:

TROY Standard UV Ink & Toner solutions appears black to the naked eye, but fluoresces under a UV verification light. Providing a simple method for level 2 document authentication, this solutions allows organizations like yourself to validate each document's originality.
